Introduction: Academic software

Introduction: Customer need driven software

- ✓ **Customer** has some requirement they are willing to pay for
- ✓ **Project** is defined, contract signed
- ✓ **Software** is:
 - Developed
 - Tested
 - Deployed
 - Maintained
 - Evolved

Introduction: Start ups / Product development

- ✓ Have software idea / competence to be marketed
- ✓ Raise capital
- ✓ **Software** is:
 - Developed
 - Tested
 - Deployed
- ✓ **Market product**
 - Maintain
 - Evolve

Introduction: A mixture of domains

Domain Knowledge

- Science
- Finance
- ...

Computing

- Bare metal
- Hypervisor
- Virtual machines
- Containers
- HPC
- ...

Management

- Project management
- Team management
- ...

Critical Factors

- ✓ Mindset
- ✓ Skillset
- ✓ Toolset

Projects: What is a project ?

- ✓ Has a specific set of **objectives**
- ✓ Is a structure to complete a specific set of **deliverables**
- ✓ Has specific **dates** (start . . . end)

Agile: Definition

<https://www.dictionary.com/browse/agile>

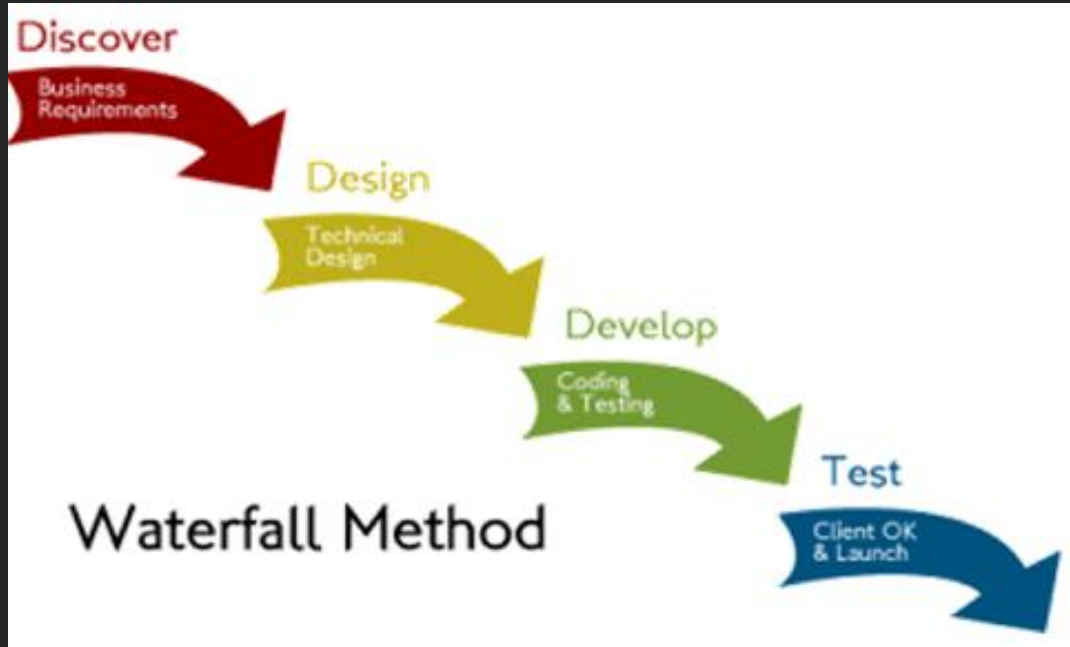

agile [aj-uhl, -ahyl] 

[SYNONYMS](#) | [EXAMPLES](#) | [WORD ORIGIN](#)

adjective

- 1 quick and well-coordinated in movement; lithe:
an agile leap.
- 2 active; lively:
an agile person.
- 3 marked by an ability to think quickly; mentally acute or aware:
She's 95 and still very agile.

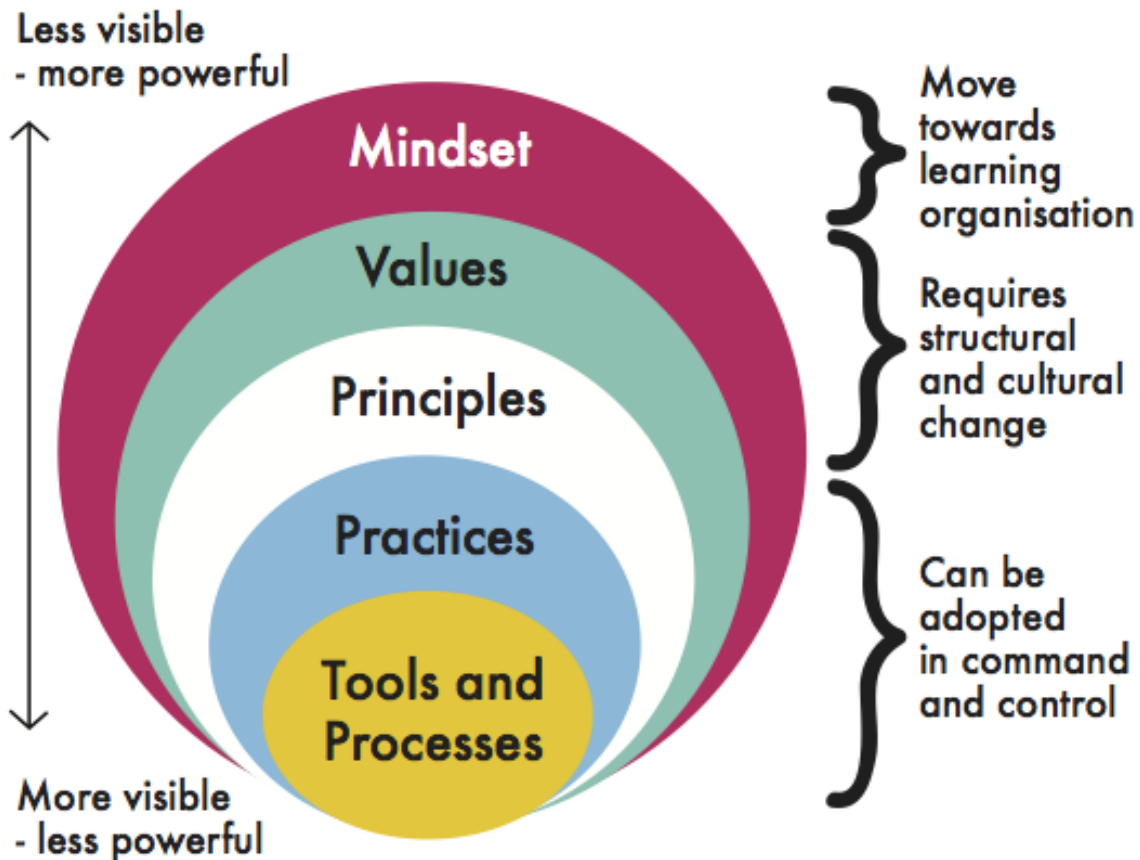

Agile: Software development

Agile: so much myth

1. Agile is new
2. Implementing agile is easy
3. Agile gives instant benefit
4. Agile means no documentation
5. Agile means “hacking” code together with little thought of architecture or design
6. Agile is a silver bullet
7. To be agile, just read a book
8. Agile only relates to software delivery
9. Agile should replace everything all at once in a big bang transformation
10. Agile means no planning, just do it ✓

To Be Agile

Introduction

Projects

Software Project Life Cycle

Agile Methodology

An example

Summary

An example

1. Define a project

- i. Master document
- ii. Features document (test outline)

2. Collaboration strategy

- i. Setup a task flow system (Trello / JIRA)
 - Team, board, cards (focus on flow, not keeping lists)
- ii. Setup an engagement tool (Slack / Gitter.im)
 - Team / Group, channel (resist temptation to use it as a documentation tool)
- iii. Efforts harmonization strategy
 - Routine meetings, Sprints, stand-ups (stick to your routines, change them consciously)

3. Rest of the stuff . . .
